**Risk Assessment April 2022 v0.1**

Previous Review Date:	March 2021
Resolved by Council on:	22 April 2021

Risk is the threat that an event or action will adversely affect an organisation's ability to achieve its objectives and to successfully execute its strategies. Risk management is the process by which risks are identified, evaluated and controlled. It is a key element of the framework of governance together with community focus, structures and processes, standards of conduct and service delivery arrangements.

The Parish Council is required under regulation 3 of the Governance and Accountability for Smaller Authorities in England (March 2018) to ensure that it has a sound system of internal controls which:

- a. Facilitates the effective exercise of its functions and the achievement of its aims and objectives
- b. Ensures that the financial and operational management of the authority is effective, and
- c. Includes the effective arrangements for the management of risk

Risk assessment is a systematic general examination of working conditions, workplace activities and environmental factors that will enable the Parish Council to identify any and all potential inherent risks. The Parish Council, based on a recorded assessment, will take all practical and necessary steps to reduce or eliminate the risks insofar as is practically possible.
