

Council meeting:	15 th March 2024	Agenda item:	24/037.d
Agenda item:	Village Gates on The Common		

The reduction of the speed limit on The Common from 50mph to 40 mph is due to be undertaken early in the financial year 2024/25. The design includes a small chicane at the entry to the village (see below marked in red) but currently doesn't include entry gates.

Gateways to the village had been proposed as a possible project to be funded by CIL but if a decision on this site can be taken now it can be factored into the Highways project. The cost of installation would be approximately £2,500 and the design would be as below.
